

COMMUNITY BASED FAMILY PLANNING & REPRODUCTIVE HEALTH

MSH brings health services and information to people where they live and expands community-based care to effective and accessible family planning and reproductive services.

— THE CHALLENGE —

225 million women
*lack access to effective
family planning.*

74 million women
*in developing countries have
unintended pregnancies.*

USAID-funded, MSH-led projects include:

UGANDA/STRIDES for Family Health

- provided contraception that helped women avoid **190,566** *unintended pregnancies.*
- reached **921,112** *new family planning users* and served **720,674** *returning clients.*
- established male champions in **15** *districts* to demystify the practice and clear up misconceptions about side effects.

MADAGASCAR/MIKOLO

- in 2015, reached **76,011** *new users* and **79,315** *continuing users* with family-planning services.
